

Niveau 1 facile

Niveau 2 : moyen

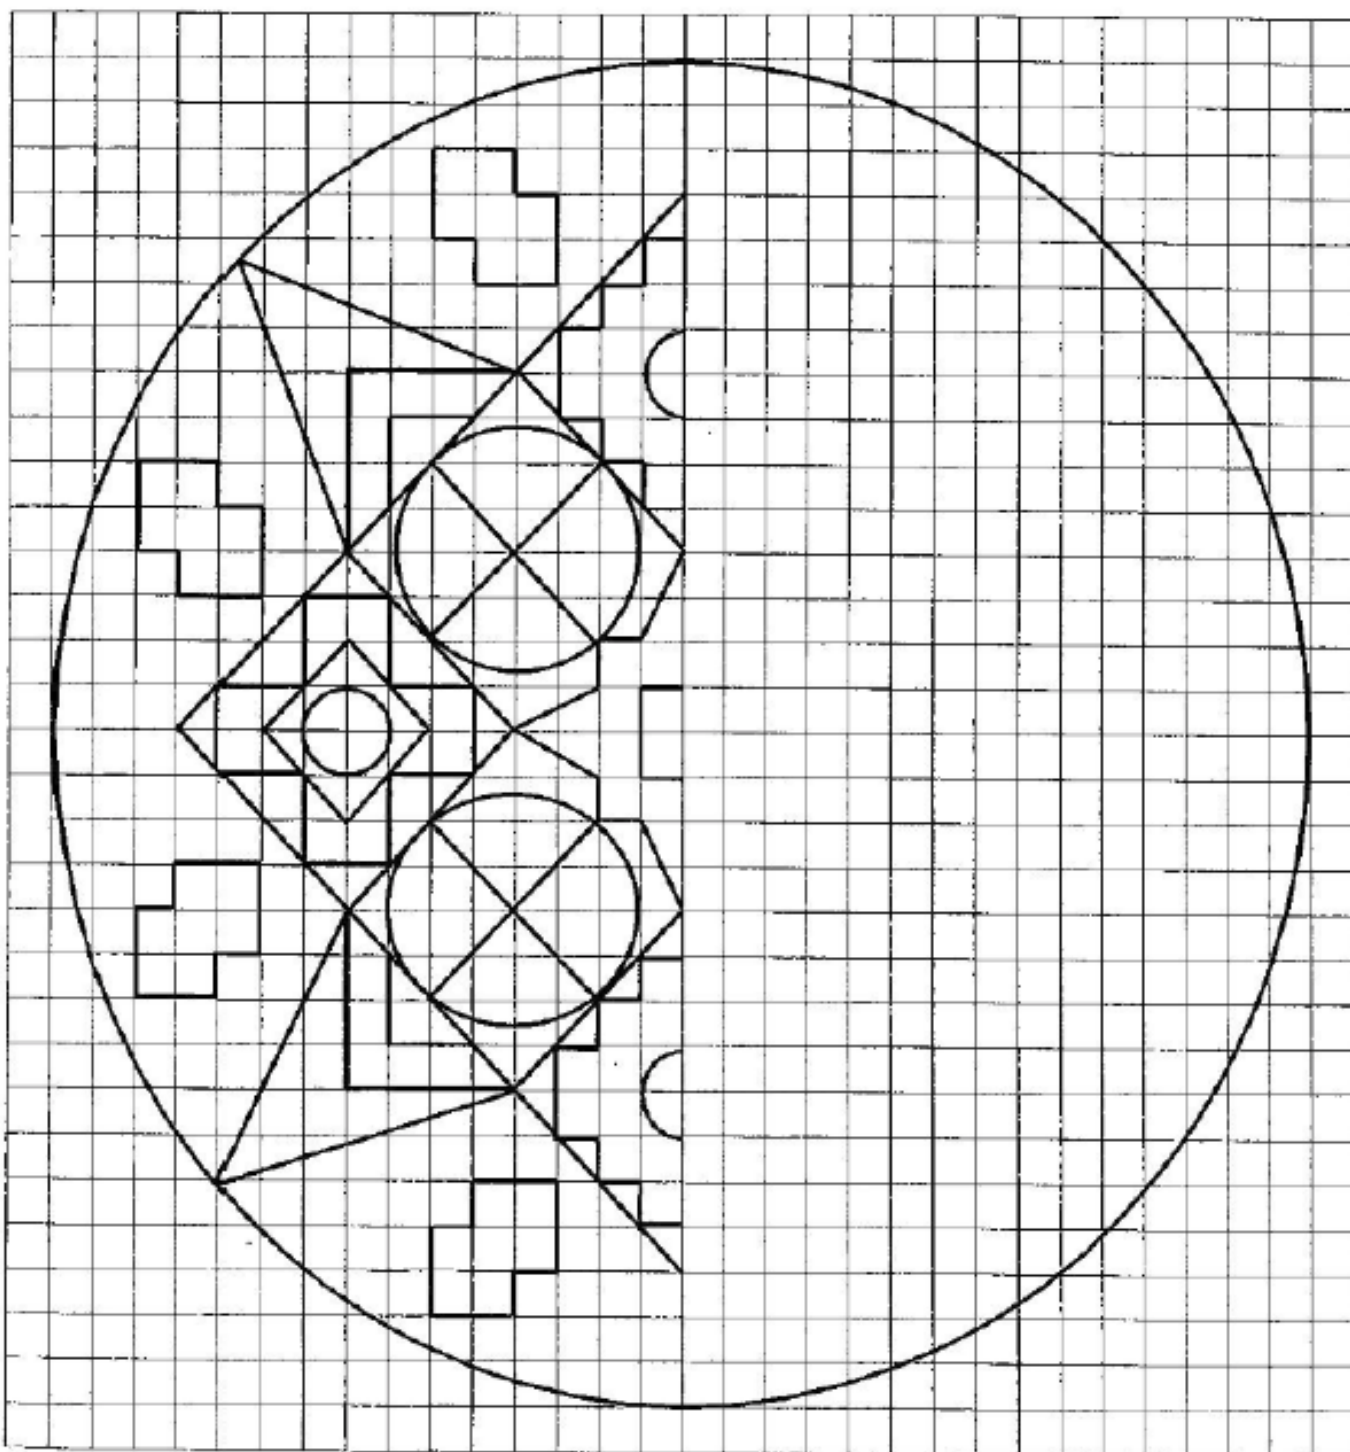

Niveau 3 : difficile ATTENTION il y a un axe de symétrie **vertical** et un **horizontal** !

Niveau très difficile : les CM2 c'est un bon entrainement pour ce qui vous attend en 6^{ème} !

- L'axe de symétrie est à 16 carreaux. Je te conseille de le tracer avec un crayon foncé pour que tu le vois bien.
- Compte bien les carreaux entre chaque figure de part et d'autre de l'axe.
- Fais attention aux cercles, repère leur rayon et leur centre !

Quand tu as terminé, colorie tes dessins avec des couleurs vives, et n'hésite pas à me les envoyer par mail !
